Day 03 - Lab: Attribute Query

Lab 3: **Explore your data** (45 minutes)

Goals: Explore several ways of working with attribute data: Using pop-ups and panes, format a table to show fields of interest, query and summarize your data, and create a chart to represent attribute data visually.

Complete the following:
- **Tutorial summary**
- **Open the project**
- **Explore regions and their attributes**
- **Design fields**
- **Query the table**
- **Summarize table values**
- **Chart sheep distribution by region**
- **Configure pop-ups**
